

# Al in the Contact Center

Jeremy Miller – Verint Systems 5.2.2024

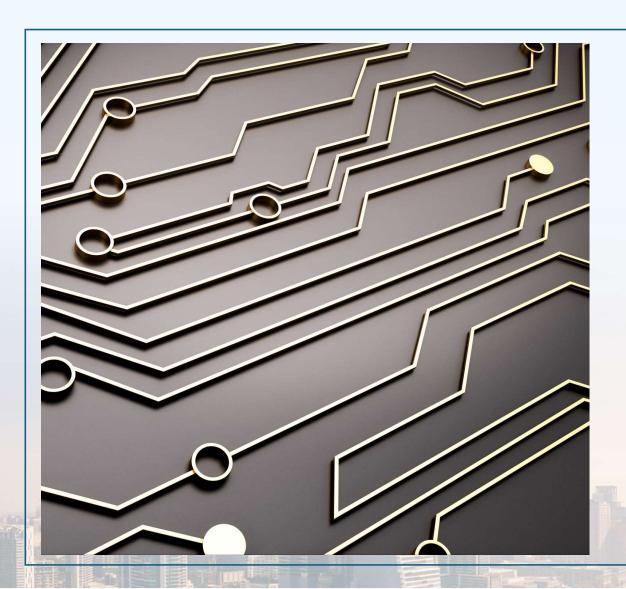

# Contact Center Al Initiatives

- What are appropriate uses for AI within the Contact Center?
- What does AI excel at? Where does it fall down?
- Why trust AI?
- Al Readiness
- Examples of Al-driven workflows

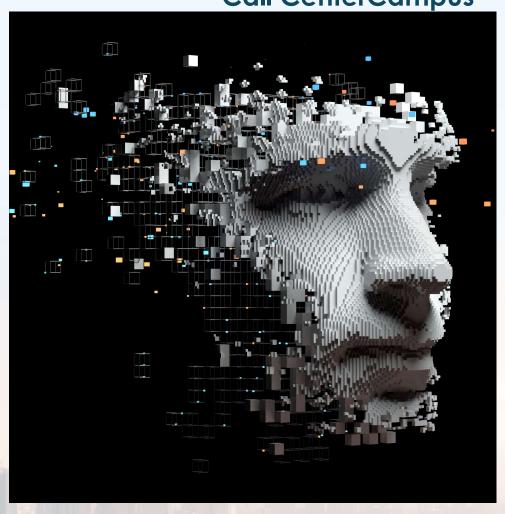

### Strengths of Al

- Mundane Tasks
- Thankless Tasks
- "Always On" processes
- Data-Heavy Tasks
- Finding Emerging Patterns

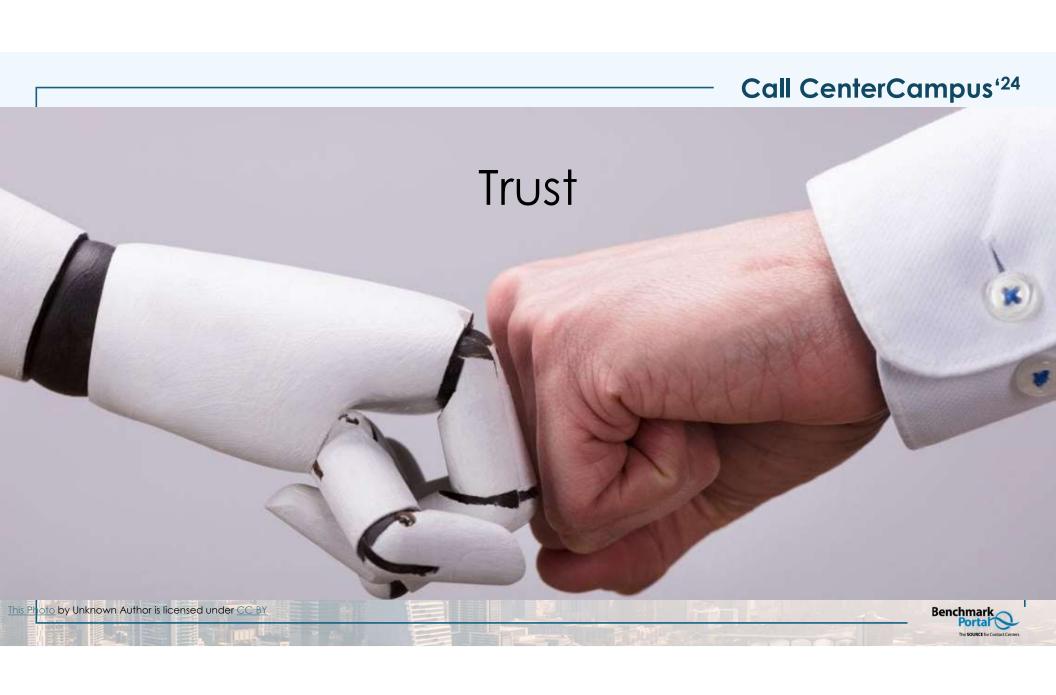

# Al: Appropriate Use Cases

- Time-consumptive, repetitive processes
- Tasks for which a welldefined output exists
- Processes that rely on or benefit from leveraging large amounts of data

# Guiderails/Training Data

- Al is only as good or as trustworthy as the data it's trained on
- Training data dictates the results that the AI produces
- Train your AI on data relevant to your business
- Trust, but verify

## Al Readiness

- Your contact center does work similar to what we've just discussed
- You have infrastructure to support the kinds of connections AI requires (APIs, etc)
- Talk to our friends at Benchmark Portal

# Example Solutions

- Interaction Wrap-Up Bot
- TimeFlex Bot
- Data Insights Bot

# Interaction Wrap-Up Bot

#### Where is it used?

Anywhere there is a live interaction between a human agent and a consumer.

#### What does it do?

Augments the agent by summarizing the call in real-time to automate wrap-up.

#### What is the value?

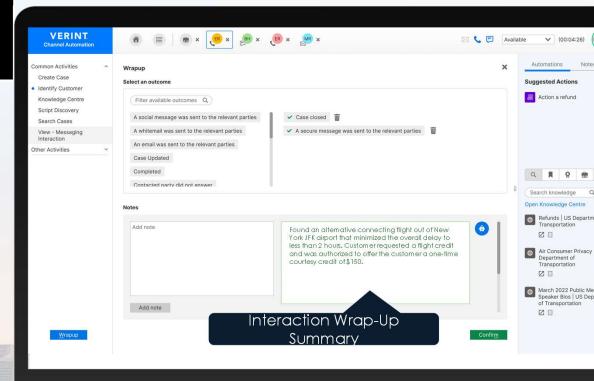

By automating call summary, the after-call work related to summarization is reduced from 30-45 seconds to 5 seconds.

### What Does it Do?

The Interaction Wrap-Up Bot delivers precise summary notes, seconds after a call concludes.

- Leverages Verint Da Vinci Real-Time Transcription & generative AI
- Agents can review, edit, and approve the summaries
- Summaries can be integrated for publication in CRM systems

### What is the Value?

#### **Reduce Operational Cost**

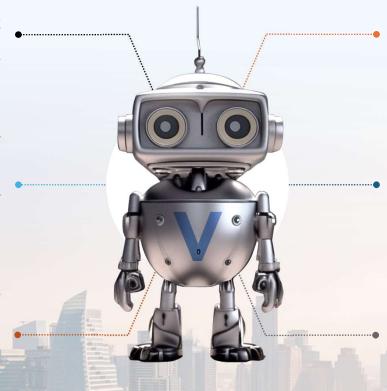

Reduce expense of manual after-call summary creation, which can cost organizations millions of dollars annually.

#### **Gain Efficiency**

Real-time nature of bot improves agent efficiency and enables agents to focus on customer interactions rather than lower-value effort.

#### **Optimize Effectiveness**

Deliver summaries in a consistent format reducing content gaps, eliminating bias, and increasing accuracy and quality.

#### **Decrease Compliance Risk**

Remove the risk of capturing sensitive customer data in handwritten notes or notetaking applications.

#### **Elevate Agent Experience**

Replace mundane, manual postcall summarization to enable agents to quickly transition to helping the next customer.

#### **Improve Customer Experience**

Thorough, accurate summaries in CRM help agents understand previous interactions and provide faster, more personalized support to customers.

#### **Situation**

A 1000 agent contact center handling 6M calls per year currently spends 2.5 minutes in after-call work manually creating summaries. That would equate to spending \$15M annually on this task at \$1/min on after-call work.

#### Solution

Verint Da Vinci Real-Time Transcription & Interaction Wrap-Up Bot were implemented to automate interaction summaries immediately upon completion of calls.

#### Result

- Reduced after-call work time per call by 90 seconds.
- Reduced annual spend on after-call work by \$9M.
- Achieved ROI for the solution in less than 60 days.

# TimeFlex Bot

#### Where is it used?

Any time an agent wants to make a change to their schedule.

#### What does it do?

Leverages CX data and innovative game mechanics to enable permissionless, agent initiated, schedule changes at scale.

#### What is the value?

Empowering agents to manage their own schedules delivers significant improvements to absenteeism and attrition.

# Data Insights Bot

#### Where is it used?

Anywhere in the enterprise, by business and operational users alike, who need to easily access analytics to gain insights.

#### What does it do?

Allows any user to search and discover actionable insights quickly and efficiently, across all the data within the Engagement Data Hub, without any data analytics skills.

#### What is the value?

Helps organizations reduce complexity of data analytics, increase productivity, and expand access to the insights needed to elevate the customer experience.

## Real Al

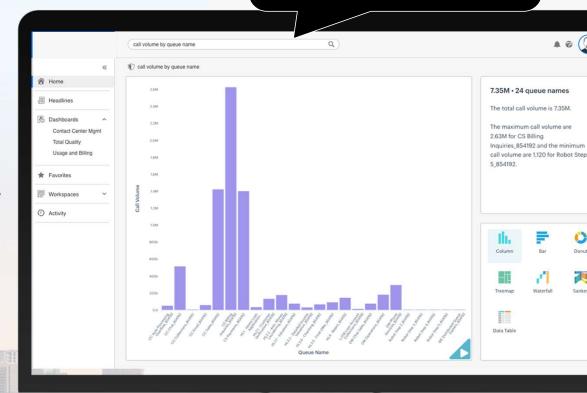

### Data Insights Bot

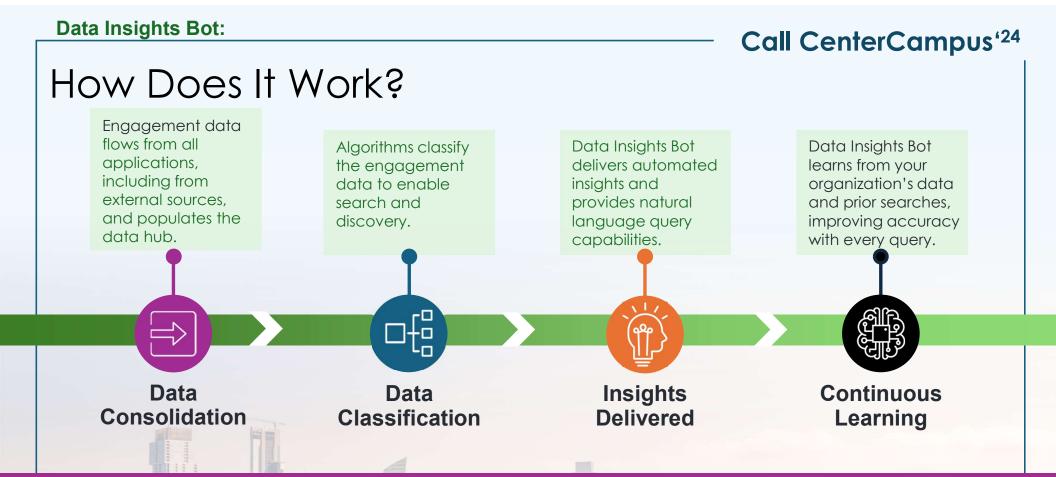

Provides users self-service access to their organization's engagement data—with zero training required—using a highly intuitive, search-driven interface powered by natural language search and AI.

- Harnesses the combined interaction, experience, and workforce data from multiple sources in the Data Hub, driving enriched reporting and insights.
- Delivers actionable insights by using natural language queries and running powerful data models across your engagement data.
- Runs Al-powered algorithms to automatically surface anomalies and trends in your data.

"What is the AHT vs forecasted handle time this month?"

"Show me the ACV vs FCV in 2023 grouped by media channel?"

Effortlessly discover and understand your engagement data, making complex analysis consumable via meaningful visualizations and Al-driven explanations.
